

# Suction anchors

Clients	Various
Weight	Up to 140 tonnes
Length	Up to 17 metres

Within a very short time Bladt Industries A/S has successfully added subsea equipment and suction anchors in particular to its range of products for the offshore oil and gas industry.

The success in the market is achieved by a combination of Bladt Industries' expertise in the rolling of heavy pipes, years of experience from the offshore oil and gas industry as well as the optimal production facilities with own quay and direct deep water access.

Since 2005 subsea equipment with a diameter of up to 7 metres, depending on the client's designs, has been shipped out from Bladt Industries' quay in Denmark.

Bladt has delivered suction anchors worldwide from Angola in South to Norway in North.

The increased demand for the high quality suction anchors from Bladt Industries is due to the fact that suction anchors are quicker to install and much more cost effective than the other installations.

Among our clients are Technip France, Technip UK, APL, Doris Engineering and Sevan.
