Aalborg, 8 November 2021

Bladt Industries wins its largest offshore wind turbine foundation project to date

Danish renewable energy Company Bladt Industries will supply 176 transition pieces to the U.S. Coastal Virginia Offshore Wind (CVOW) project. The wind farm will be established some 40 kilometers off the Virginia U.S. East Coast. The order is the largest TP contract ever for Bladt Industries.

Bladt Industries has signed a new contract with Dominion Energy to supply the Coastal Virginia Offshore Wind (CVOW) project with a total of 176 transition pieces. The project is located in US federal water, 43.5 kilometers east of Virginia Beach.

CEO Anders Sjøe-Jensen from Bladt Industries signed the contract with Dominion Energy in Richmond, Virginia, and now the planning and execution of the giant order can be initiated:

“We are proud to be selected by Dominion Energy for this contract based our experience and proven track record. Likewise, we are extremely proud to be part of building up the growing American Offshore Wind industry”, he says and continues: “CVOW will be America’s largest windfarm with 2.6 GW of output, creating many local jobs in construction and years of operation”.

- It’s a great day for us at Bladt Industries. The order is the largest in our history and will occupy a significant part of our capacity in the coming years, says Anders Sjøe-Jensen.

Production starts in March 2023 at Bladt Industries site in Aalborg, Denmark. The last load out is scheduled for July 2025. The transition pieces are up to 30 meters high and close to 8 meters in diameter. Each element weighs 540 to 570 tons, including secondary steel:

- We are the world leader in manufacturing of transition pieces and have so far delivered to a third of the world’s offshore wind turbines foundations. This project consolidates our position and gives us an even better starting point for the US market, says Anders Sjøe-Jensen.

Once the Coastal Virginia Offshore Wind farm is complete, it will provide energy for up to 660,000 homes and will create long-term jobs once the wind farm is fully built.

“Bladt Industries is an industry leader in providing offshore wind components and we look forward to working together to advance the Coastal Virginia Offshore Wind project to bring utility scale offshore wind generation to our Virginia customers,” said Joshua Bennett, Dominion Energy vice president of offshore wind.

About Bladt Industries

Bladt Industries is a leading supplier within offshore wind turbines. In the last 25 years, the company has delivered more than 2,500 offshore wind turbine foundations, equivalent to more than a third of all the world's offshore wind turbines. Bladt Industries has also supplied a significant number of offshore substations for offshore wind farms. Bladt Industries is the foundation for the green energy transition offshore.
