

Press Release

Bladt Industries Secures Additional 28 Hornsea Transition Pieces

Additional 28 transition pieces for the Hornsea Project One have been added to the manufacturing portfolio of Bladt Industries in Aalborg. Bladt Industries appreciates the confidence shown by Ørsted (previously DONG Energy) in placing the manufacturing of the additional TPs at the yard in Aalborg.

In total, Bladt Industries has now contracted 124 TPs on Hornsea Project One of which Bladt Industries currently fabricates 68 in Aalborg, Denmark. The remaining 56 TPs are subcontracted to EEW Offshore Structures Britain (EEW OSB) in the UK, of which EEW SPC recently acquired full ownership. The fabrication of the Hornsea TPs at EEW OSB will continue unchanged.

Bladt Industries continues to focus on UK projects, and will remain a strong strategic player in the offshore foundations market with a continued strong focus on the UK market and is currently working to optimise the future local UK content offerings.

About Bladt Industries

Bladt Industries is an international steel contractor specialising in large-scale and highly complex steel structures. Bladt Industries operates in three key areas of business providing steel solutions for the wind and renewable energy sector, for the oil and gas industry, and for infrastructural projects with a main focus on foundations and substations for the offshore wind energy market. Bladt Industries is headquartered in Denmark and has two production sites in Denmark. Additional information about Bladt Industries is available at www.bladt.dk.
