Offshore accommodation module for Mærsk

CLIENT

Semco Maritime

CONTRACT TYPE

Individual trade contract

TIME FRAME

2015-2016

LOCATION

Mærsk Guardian

Project description

As individual trade contractor for this project, Bladt Industries' scope of work was to fabricate an accommodation module divided into two blocks. Each block has a length of 40 metres, a width of 14 metres and are 13 metres high. The module consists of 564 tons of steel in total, all fabricated by Bladt Industries.

After prefabrication, the module was transported to Frederikshavn and installed directly on Mærsk Guardian as part of an upgrade for the rig's accommodation.

FACTS

- 564 tons steel
- Including skidding and load-out on transport barge

 It is all about steel
