Spectacular gangway bridge at Odense Railway Station

## CLIENT

Odense Municipality

## CONTRACT TYPE

General contract

## TIME FRAME

2014-2015

## LOCATION

Odense, Denmark

## Project description

For this contract, which was finalised in July 2015, Bladt Industries was responsible for fabrication, delivery and installation of a double curved bridge that crosses the railway at Odense Railway Station. The project included foundations, steel, electrical works, elevators, lighting, earth works, planting, etc..

The contract also included fabrication and installation of a 37 metres high conical pylon with a black steel core covered with 2 mm highly polished stainless steel as well as a 30 metre concrete stairway.

The City's Bridge has been nominated and awarded prizes by several culture and architecture authorities for both design and execution.

## FACTS

- Weight: 403 tons
- Length: 135 metres
- 37 metres high pylon
- 2 x 90 metres ramps
- 7 metres high concrete stairway
- Odense Municipality's Architecture Award

 Quality is **everything**
