

Modules & Topsides

Take advantage of our expertise

The Bladt Industries portfolio includes modules for the offshore oil and gas industry as well as the offshore wind energy sector. We fabricate a variety of modules and topside structures for fixed production platforms including deck sections, wellhead modules, subsea templates, living quarters, substations, control rooms and other structures at clients' request.

With safety and quality as our highest priorities, we fabricate and erect structures capable of withstanding the challenges of tomorrow.

With facilities in Denmark, Germany and Poland designed for the fabrication of complex large-scale structures, we deliver the most cost-efficient solutions for our clients.

Over the years, Bladt has played a key role in numerous platform construction projects including:

- Walney I & II substation and jackets
- Gunfleet sands offshore substation
- Nini East topside and jacket
- Nini topside and jacket
- Cecilie topside and jacket
- Halfdan III jacket
- Halfdan I jacket
- Harald West B jacket

 We will meet your demands at all times.

Our integrated inhouse facilities mean that we can offer a range of services, including PC and EPCI contracts, according to our clients' needs.

OFFSHORE MODULES

- > Process modules
- > Gas gathering modules
